CONSENT FORM · NEW AND EXISTING CONTACT LENS WEARERS

Contact Lens Wear & Care Agreement

Contact lenses are medical devices. Used correctly they are safe and comfortable; misused, they can cause serious infections that threaten sight. Please initial each section.

01 Fitting services & fees

What the fitting includes — Initials

The contact lens evaluation and fitting fee (amount) is separate from the eye examination. It includes measurements, trial lenses, insertion and removal training, and follow-up visits for days days. Specialty lenses (toric multifocal, rigid gas-permeable, scleral, orthokeratology, myopia control) carry additional fees, quoted before fitting.

Prescription release — Initials

Your contact lens prescription is finalised only after the fitting is complete and the lenses are confirmed healthy and effective. You will receive a copy at that time and may buy lenses wherever you choose.

02 Safe wear rules

Hygiene — Initials

- Wash and dry hands before touching lenses.
- **Never expose lenses to water** — no tap water, swimming, showering or hot tubs in lenses; never rinse lenses or case with water. Water carries Acanthamoeba, which causes a painful, hard-to-treat infection.
- Use only the recommended solution. Never top up old solution; never use saliva.
- Rub, rinse and air-dry the case daily; **replace the case every 3 months**.

Wearing schedule — Initials

- Do **not sleep in lenses** unless specifically approved by your eye doctor — overnight wear increases infection risk many times over.
- Replace lenses on schedule (daily / two-weekly / monthly). Do not stretch the replacement period.
- Do not exceed hours hours of wear per day. Always have up-to-date backup glasses.
- Never share lenses, including coloured / cosmetic lenses.

03 Warning signs — remember RSVP

Contact lens emergency

Remove your lenses and call us the **same day** if you notice **R**edness, **S**ensitivity to light, **V**ision that is blurry, or **P**ain. Do not put lenses back in until you are examined. Bring the lenses and case with you.

Risks I understand — Initials

Complications can include corneal infection (microbial keratitis), corneal ulcer and scarring, abnormal blood-vessel growth, allergy (giant papillary conjunctivitis), dry eye and, rarely, permanent loss of vision. Risk is lowest when the rules above are followed and annual examinations are kept.

04 Follow-up care

Annual review
Contact lens prescriptions expire. An annual (or more frequent, if advised) contact lens examination is required to renew it and to check corneal health, even if my eyes feel fine.
