CLINICAL NOTE · VERGENCE, ACCOMMODATION & OCULOMOTOR WORK-UP

Binocular Vision & Accommodation Assessment

Full binocular work-up with reference values alongside each measurement, diagnostic classification and treatment plan. Use with the CISS (EYE-08).

Completed by: Clinician | Use as: Note template | Time: 30–45 min

Patient name	Date of birth	Patient ID / MRN	Date of service	Clinician

01 History & symptoms

Symptoms (asthenopia, diplopia, blur, headaches, reading)

Visual demands / school / work

CISS score / 60

Concussion / TBI history

Current correction

Medications affecting accommodation

Habitual / test correction	Sphere	Cylinder	Axis	Prism	Base	Add	VA distance	VA near
OD								
OS								

02 Measurements

Expected values: Morgan / Hofstetter / Scheiman & Wick

Test	Result 1	Result 2 / OS	Expected
Cover test — distance	Δ	Δ	ortho to 1Δ exo
Cover test — near	Δ	Δ	3Δ exo ± 3
NPC — break / recovery	cm	cm	< 5 cm / < 7 cm
NPC with red lens / repeated	cm		no recession
BI vergence — distance (x / break / rec)			x / 7 / 4
BO vergence — distance (blur / break / rec)			9 / 19 / 10
BI vergence — near (blur / break / rec)			13 / 21 / 13
BO vergence — near (blur / break / rec)			17 / 21 / 11
Vergence facility (12Δ BO / 3Δ BI)	cpm		15 cpm
AC/A (gradient / calculated)			4 : 1 ± 2
Accommodative amplitude OD / OS (push-up)	D	D	15 - 0.25 × age
Accommodative facility ±2.00 — monocular	cpm	cpm	≈ 11 cpm (adult)
Accommodative facility ±2.00 — binocular	cpm		≈ 8 cpm (adult)
MEM retinoscopy (lag)	D	D	+0.25 to +0.75
NRA / PRA	D	D	+2.00 / -2.37
Fixation disparity / associated phoria			none
Stereo (test)	arc sec		≤ 40 arc sec

Reference values are population guides; interpret against age, symptoms and your practice's normative tables.

03 Oculomotor & perceptual

Test	Result	Notes
Pursuits (NSUCO ability / accuracy / head / body)		
Saccades (NSUCO ability / accuracy / head / body)		
DEM — vertical / horizontal / ratio / errors		
Reading eye movements / speed		
Visual-perceptual screening (if indicated)		

04 Diagnosis

Classification

- ☐ Convergence insufficiency
- ☐ Convergence excess
- ☐ Divergence insufficiency
- ☐ Divergence excess
- ☐ Basic exophoria
- ☐ Basic esophoria
- ☐ Fusional vergence dysfunction
- ☐ Accommodative insufficiency
- ☐ Ill-sustained accommodation
- ☐ Accommodative excess / spasm
- ☐ Accommodative infacility
- ☐ Oculomotor dysfunction
- ☐ Vertical phoria
- ☐ Normal binocular function
- ☐ Other: _____

- ☐ **H51.11** Convergence insufficiency
- ☐ **H51.12** Convergence excess
- ☐ **H52.52-** Paresis of accommodation
- ☐ **H52.53-** Spasm of accommodation
- ☐ **H50.51 / .52** Esophoria / exophoria
- ☐ **H53.3-** Disorders of binocular vision
- ☐ **H55.81** Saccadic eye movements
- ☐ **H53.2** Diplopia
- ☐ **H53.14-** Visual discomfort (asthenopia)

05 Plan

Management

- ☐ Office-based vergence / accommodative therapy + home reinforcement
- ☐ Home-based therapy only
- ☐ Computer orthoptics
- ☐ Plus lenses for near
- ☐ Prism (amount / base): _____
- ☐ Observe & re-assess
- ☐ Refer (neuro-ophthalmology / concussion clinic)

Planned sessions / frequency

Therapy goals

Re-evaluation after sessions

- ☐ **92060** Sensorimotor exam (multiple measurements)
- ☐ **92065** Orthoptic training, by physician / QHP
- ☐ **92066** Orthoptic training, under supervision
- ☐ **92015** Refraction
